

Special Jobs for Special People!

If you've ever worked in military intelligence or special operations, you know you're part of a very special community. Your work and your life are often inseparable. Representing the "best of the best," you've come to love your work, especially the bright and energetic people with whom you work. You would love to continue working in this career and remain a member of this community.

But what happens when your service ends? Are you able to find employment that is as professionally and personally rewarding? What jobs are available and which employers readily seek your special skills?

Alternative Careers in Secret Operations is the first book to outline job and career alternatives for the many thousands of people with backgrounds in military intelligence and special operations. It shows:

- How to conduct an effective job search in the civilian work world.
- Where to find job vacancies in both the public and private sectors using newspapers, professional publications, the Internet, and Intellink.
- How to best write a resume that really showcases your major strengths.
- Which Web sites are most relevant to the intelligence community.
- Major companies hiring individuals with special operations backgrounds.

Combining insights into the job search with an extensive listing of key employment contacts, the book is literally a road map to renewed career success for special people who have very special career needs. Don't make your next career move without first examining the wealth of advice and information found in this ground-breaking book!
