

Surviving the Corrections Experience

COMING IN OCTOBER, 2014!

A Map Through the Maze: A Guide to Surviving the Criminal Justice System (2nd Edition)

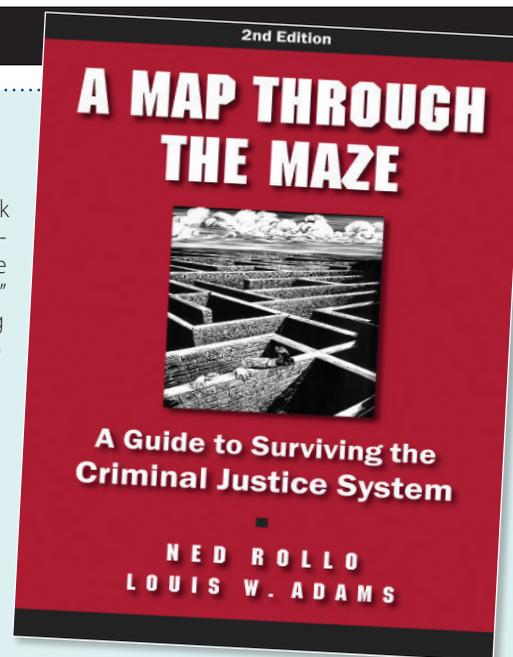

Ned Rollo and Louis W. Adams

Wow, the perfect book and lifeline for all locked up offenders who need practical guidance on what lies ahead and wise advice on how to best cope with their situation. Designed by a former prisoner and seasoned correctional educator to assist an often soon-to-be-forgotten population – prisoners during their first few critical weeks of incarceration who are low on motivation and high on fear and anxiety. New and updated version of this powerful classic shows how inmates can best survive and thrive in what is often a difficult, depressing, and dysfunctional prison environment.

Maybe you're new to this expensive punishment system, or perhaps you're a repeater who's familiar with the routines. Indeed, you've just been processed into prison where you must learn to sink or swim. From Day One you begin learning all its controlling rules and regulations as well as encounter the good, the bad, and the ugly. Now what? How will you manage this situation? What attitudes and actions do you need to survive and prosper? You have months, maybe years, ahead of you in what often becomes a mind-bending environment. Warning: Don't love your mind!

Designed as a psycho-social map for handling the corrections experience, this book documents predictable social and emotional stages of incarceration. It encourages the positive use of one's time, from overcoming alienation and rage to developing personal growth. Includes compassionate advice for families and loved ones. Ideal resource for inmate orientation as well as for promoting life skills and social development. A "must have" resource

for all inmates. This book serves as the key participant (inmate) resource for the new "Now What" DVD orientation training program designed to help the newly incarcerated mentally adjust to the realities of an intimidating and controlling prison system where "freedom" is just a word about the outside world. Especially helpful to families and loved ones who want to know what they can do to be more supportive of their son, daughter, or friend. Inmate reactions – "Finding this book was like finding a gold mine...motivated me to change my thinking process and the way I perceive things!" 112 pages. 2015. ISBN 978-1-57023-353-1. **\$9.95. Empowers inmates to build a motivational foundation based on a sense of "connection and concern" and the realistic hope of future good. Socialization: Getting Along

Inmates talk about their lifelong difficulty in getting along with others, and their new understanding of how to develop healthy relationships. As one inmate explains, "We have difficulty getting along because we lie and cheat and manipulate to get what we want." Whether their socialization problems stem from childhood abuse, fear of abandonment, or feelings of worthlessness, the inmates candidly discuss the challenges and benefits of learning to build relationships based on trust and respect. They discover that: empathy for others can be learned and developed, the inability to admit fault keeps you isolated, genuine relationships are based on honesty, conflict is a natural part of relationships, and alcohol and drugs distort the way we experience relationships.
